EXPERIENCE

One More Cup – 2D Pixel Artist | [Itch Page](#)

2025 Itch Winter Micro Game Jam #52

- Created the majority of the game's pixel art, including character sprites and animations, environment tiles, menu screens, and UI elements.
- Produced assets within a 48-hour development cycle.
- Collaborated with programmers to rapidly prototype and implement assets.

Colosseum Ascendant — 3D Artist | [GGJ Page](#)

2026 Global Game Jam

- Created 3D weapon props including a bow, sword, and magic staff, alongside additional environment props.
- Produced game-ready assets within a 72-hour development cycle.
- Delivered and implemented assets in Unity.
- Worked collaboratively with the development team to meet project requirements.

PERSONAL PROJECTS

Bedroom Environment – 3D Project

Blender | [ArtStation link](#)

- Created a complete 3D bedroom environment using reference images.
- Modelled the environment, furniture, and a range of smaller props.
- Developed the scene layout and composition to create a cohesive environment.
- Created basic materials in Blender to establish different surfaces throughout the scene.

Office Desk Environment — 3D Project

Blender | [ArtStation link](#)

- Created a detailed office desk environment featuring multiple individually modelled props.

SKILLS

3D Art: Environment art, prop creation, game-ready assets, low-poly/high-poly workflows, modular environment construction.

Software: Blender, Unreal Engine 5, Unity, Aseprite, Clip Studio Paint, GitHub

Game Development: Asset implementation, basic Blueprint scripting, version control, agile development workflows.

Other: Pixel art, concept art thumbnails, reference gathering, blockout, scene composition, team collaboration.

ACHIEVEMENTS

First-Class Honours – BSc Games Design & Development, University of Greenwich.

Digital Shark Expo 2026 – Selected to showcase the Final Year Group Project.

Micro Game Jam #52 Winter 2025 – Placed #16 out of 102 entries.

LANGUAGES

English – Fluent/Near Native
Bulgarian – Native

- Modelled furniture, desk items, and smaller assets.
- Used basic Blender materials to establish variation between different objects and surfaces.
- Focused on creating a visually appealing and cohesive environment through asset modelling and scene composition.

EDUCATION

University of Greenwich, London — *BSc Games Design & Development*

2023 - 2026

First Class Honours

Relevant Modules:

- 3D Modelling
- Game Engine Rendering Techniques
- 3D Animation Techniques
- Character Animation and Control
- Version Control and Asset Management
- Games Portfolio
- Final Year Group Project

ACADEMIC PROJECTS

E.R.O — Final Year Group Project – 3D Game/Unreal Engine 5 | [Itch Page](#)

Designed and developed a real-time 3D game in Unreal Engine 5 as part of a team. Responsible for the complete 3D asset pipeline, including:

- Reference gathering and asset blockout
- 3D modelling and UV unwrapping
- Asset optimisation for real-time use
- Implementation in Unreal Engine 5
- Maintaining a consistent visual style across assets
- Communicating with programmers to resolve implementation issues
- Managing multiple assets while working to project deadlines.

The project was selected to be showcased at Digital Shark Expo 2026.
